

With the experimental easing of the **Stay At Home Restrictions**, sanitizing and disinfection protocols need to be followed. You need the right product & the correct procedures. It's absolutely critical.

With that serious reality facing all of us — we respectfully thought that you might like to know about a highly effective, simple to use, **Canadian-made solution that will help protect you, your employees, and your customers / clients:**

“ SteriKleen can be used to disinfect hard and porous surfaces and is rated as effective for destruction of a wide range of viruses and pathogens, among them: Adenovirus Type 5, Hepatitis B & C, HIV 1, Influenza A, RSV, Avian Influenza virus and a wide range of bacterial pathogens, and fungi.

With its efficacy on a wide range of viruses, it is expected to be effective for the destruction of COVID19 if used at full strength. ”
